

# Oldham Engineering Spring 2012 – 01.06.12

## Awash with enquiries at Subsea 2012

On the 8<sup>th</sup> and 9<sup>th</sup> of February, Oldham Engineering exhibited at the Subsea 2012 Exhibition at the AECC, Aberdeen.

Sam McNeice, OEL Business Development Director, said, "the event was a great success for Oldham Engineering. Many existing and new potential customers visited our stand over the two day event".

David Baines, OEL Sales Manager continued by saying; "within the first four days of the event, three customers have already made appointments to visit our manufacturing facility in Oldham. This is a great positive first step towards developing a long term supply partnerships".

Oldham Engineering are specialists in Medium-Heavy Engineering including 2,3 & 4 axis Machining, Coded Welded Fabrications, Complex Assemblies & Turnkey Project Management. In addition to new equipment supply, we provide complete equipment refurbishment services. For further info. email [sales@oldham-eng.com](mailto:sales@oldham-eng.com), or call 0161 6275822.

## Offshore & Subsea: you are in safe, experienced hands

Oldham Engineering has been a principle supply partner for many Offshore and Subsea clients for many years. Their Turnkey Project Management expertise makes them a safe and preferred choice for the supply of all types of new and refurbished equipment, from Bend Stiffeners to complex assemblies such as Tether Clamps.

Left to Right: Pipework, Bend Stiffeners & Tether Clamps  
(The Tether Clamps were supplied to Trelleborg)
