

# Oldham Engineering Summer 2012 – 15.06.12

## NDI Provides Oldham Engineering with Opportunities

Oldham Engineering's exhibited at the NDI Opportunities Conference on 13<sup>th</sup> & 14<sup>th</sup> March 2012 at Tortworth Court Hotel near Bristol, UK.

Oldham Engineering is a specialist in Medium-Heavy Engineering. To complement their in-house Coded Welded Fabrication facility, they have a range of CNC machine tools capable of machining products up to 40 Tonnes in weight.

David Baines, Oldham Engineering's Sales Manager said, "the NDI Opportunities conference was very well attended with over 150 visitors. The discussions and meetings throughout the two day event have presented Oldham with a range of exciting prospects in this prestigious industry sector".

Oldham Engineering is a key supplier to the Defence Industry, specifically for large complex, medium-heavy engineered machined fabrications and assemblies. With the ability to machine products up to 10m long and 3.4m high, their range of advanced CNC vertical and Horizontal borers and machining centres makes them a formidable supply chain partner.

Oldham Engineering's well regarded brand and reputation for quality was reinforced by their advert in the Spring 2012 issue of the NDI's Leading Edge magazine (shown right). Copies are available on request.

## Defence Industry: Precision CNC Machined Products?

Oldham Engineering has supplied a range of products for the Defence Industry including Military vehicles, Aircraft and Munitions platforms for Military ships. They are also Turnkey Project Management specialists, providing client value-adding activities such as Complex Assembly and Equipment Refurbishment services.
